

This convenient little carrying case protects your machine while travelling and provides a comfortable writing base if you have no table. \$5.00 extra.

Weight of case 4 lbs.

Every essential feature of larger typewriters is retained; scientific modern designing has eliminated unnecessary parts and simplified the entire operation of the ALLEN.

One-third as many Parts One-third as much weight

The ALLEN Typewriter is equipped with all the desirable feature of the heavier, more expensive machines. It has the full size platen (rubber roller), takes a standard 8½" x 11" sheet of paper; has the standard shift keys; backspacer; and all other equipment. The keyboard is standard four bank; every key in the standard position; ample finger space and proper banking of keys permits the typist to operate the ALLEN with greater ease and speed.

The construction of the ALLEN Typewriter is simple and sturdy; all joints are electrically welded instead of soldered, which promotes longer life in the machine, makes it stronger, lighter, saves you time, money and energy in operating. In the ALLEN Typewriter modern engineering has perfected a machine of marvelous simplicity, durability, efficiency, eliminating all unnecessary parts, making it light enough to carry comfortably, yet strong enough to do the work of the heavier machine.

The ALLEN *Typewriter*

Specifications

ALLEN-4-Typewriter

Weight 12½ lbs; with carrying case, 16½ lbs.

Size,, 10"x12"x7" high.

Standard platen (rubber roller), 1½".

Carriage holds paper 9½" wide; writing line 7½"; writing visibility equal to any large machine.

Ball bearing carriage, front stroke type bar; rotary escapement, making easy, speedy, positive writing action.

Standard pica type on special steel type-bar held on tempered steel axle.

This new four row keyboard has a key depression of only one-half inch, a shorter depression than any other typewriter on the market, resulting in a soft, light touch which increases speed of operation.

Keyboard four row with Universal standard arrangement.

Shift keys with special lock provide faster writing ability; capital shift keys on both sides of machine.

Back spacer of extra efficiency; line spacer can be set for 1, 2 or 3 spaces between lines.

Permanent postcard and paper holder, requiring no adjustment and providing sure grip.

Left marginal stop and release; same release used for line lock release.

Paper feed roller nearly as long as platen.

Manifold of standard capacity.

Two-color ribbon, instantly interchangeable; direction change semi-automatic. Ribbon moves only when typing, no waste in ribbon.

The ALLEN Typewriter has only 700 parts, where other typewriters have from 2500 to 3000 parts; the ALLEN Typewriter weighs only 12½ lbs. whereas other standard specification machines weigh in excess of 30 lbs.
